

US Patent Pending #15,204,221
 Clip designed for maximum film hold and easy replacement.

US Patent #8,156,721
 Bushing Pin

No More
 With AME's Chain, this will never be your problem again.

AME Engineering supplies new and rebuilt horizontal form/fill/seal packaging machines and specialty patented products that increase throughput and efficiency.

Hybrid Stainless Steel Transport Chain

The gripper system consists of an entirely stainless steel attachment (clip, spring, and frame). The pin and bushing are the only components in the chain that have a top of the line nickel-plating. As a result, the chain rusts like stainless steel, and stretches like nickel-plated chains. It is reliable, wear and corrosion-resistant and is suitable for flexible, semi-rigid, and rigid applications.

- Marginal Stretch - Equivalent To Standard Nickel-Plated Chains
- Top of the Line Nickel-Plated Pin and Bushings
- Stainless Steel Components - Excluding Pin And Bushings
- No Rust
- Easy Clip Replacement
- Designed For Excellent Sanitation
- Gripper is a Dome Head - Sturdier Composition
